Table

Pair	Played	Won	Sets won–lost	Games won–lost	Place
Pair A					
Pair B					
Pair C					
Pair D					

The order of the table (FIP)

1. The pair with the most wins goes first.
2. Two pairs level: the match between them decides.
3. Three pairs level: the difference of sets won and lost in the matches among them, then the difference of games.
4. Still level: a draw of lots.

A walkover counts as 6–0 in every set needed.
